I am going to explain you this cool technique

Technique

www.ibibo.com

www.myspace.com

Join money making groups there, people there are keen to make money and join any program, which possible makes them money, now tell them to join you, via your referral link, they join and you earn

You must have seen beautiful looking female profiles on social networking sites, promoting some programs, asking you to join with their referral link, you join them and they earn

How will make big money using this

You are also paid when the members under you refer members, all commissions are 2 levels deep, and so even if you are not actively working, but members who are under you actively working, you still get paid, that's the residual income

Members who are from money making groups, if they join under you, they are the ones who work hard, and refer more members and you earn more money

New offers will be continuously added to the system, and so member under you complete those offers you will get paid
